

HOW DO ULTRALIFE'S LITHIUM THIONYL CHLORIDE CELLS STACK UP?

Ultralife's new Generation X Thionyl Chloride cells are manufactured in our fully renovated factory with cutting edge process control to ensure high and consistent performance, compared to the leading competition in the market.

Real world testing, shown here, verifies that Ultralife's performance across temperatures and rates is on-par with the competition. Performance, price and lead time make Ultralife Generation X cells a great option.

DISCLAIMER

All cells tested (Ultralife and competitors) were verified as authentic, less than 6 months old, and properly de-passivated prior to testing. Test data shows the average results from 5 samples at each temperature and rate. Some test data may be unavailable at the time of publication, or in process. This report is subject to updates at any time. For the most recent edition, please visit the Ultralife website.
